

# ARE YOU USING THE RIGHT TECHNOLOGY?

In a world of changing preferences and earth-conscious options, **DermaRadiance™** provides a natural path to microdermabrasion. Renewing your client's skin without harsh chemicals that cause irritation and redness, DermaRadiance™ offers two customizable systems to meet your client's treatment and skin care needs.

**DermaRadiance™ Pure Flower Grains** is one of the easiest and most effective anti-aging services available, providing optimal results and benefits for multiple skin types. The pure flower grains deeply, yet gently, exfoliate dead skin, while applying invigorating, powerful nutrients to the skin's surface.

**DermaRadiance™** microdermabrasion is infused with serums to polish the skin, while helping to soften fine lines and wrinkles. It smoothes coarsely textured skin and decreases the appearance of scarring and pore size for youthful-looking, radiant skin.

## Two Great Treatments One Great Unit
