**SMOOTHSCULPT**

## **SmoothSculpt by Satin Smooth Introduces Breakthrough Technology Focusing on Firming and Tightening Skin**

**Stamford, CT** – Satin Smooth unveils their latest innovation in the fight against cellulite and loose, sagging skin. With advance aesthetic technology by means of a non-invasive holistic approach, SmoothSculpt is designed to help in the following areas of concern:

Facial Contouring and Lifting - **Brows/Jowls**  
Abdominal Contouring and Tightening - **Post Maternity/Liposuction**  
Butt and Thigh Sculpting and Toning - **Inner/Outer Leg/Knees**

SmoothSculpt focuses on the treatment of Extra Cellular Matrix, (ECM) which is a *FILTER SYSTEM* which sits between blood vessels, nerves and cells. Over time, cellular debris and toxins accumulate and create skin dimples or cellulite. The treatment is administered by a trained and certified aesthetician, who will use a mechanical wand which utilizes pressure (pulsing) and suction movement to stimulate the skin. This action will promote lymphatic drainage; relieve lymphatic blockage and stagnation of ECM. This will also help cleanse the ECM, support blood flow and collagen stimulation to plump and firm the skin.

The science behind the SmoothSculpt is to unclog the stagnation and congestion, while breaking down fat and reducing the appearance of cellulite with the pulsing and suction effects. The treatment is chemical free, there are no injections, no down time and there are noticeable results based on your age, and diet. SmoothSculpt is also a great alternative for individuals who have had dramatic weight loss, as the system simulates collagen while plumping and firming.

SmoothSculpt is also a great alternative for individuals who have had dramatic weight loss and want to firm and tone, as the system does deliver collagen to plump and firm.

The SmoothSculpt treatment begins with a relaxing Collagen Complex Cream, a homeopathic elastin formula and is followed by deeply active Chocolate Contouring Cream (a homeopathic formulation of Chocolate, Ivy, Juniper and Dandelion). This contouring cream contains caffeine which has anti-inflammatory and stimulating effects thus cleansing the toxins and toning of the tissue. The *area of focus* is then firmly massaged in slow and steady motion with the hand piece.

**Who can benefit from SmoothSculpt?** Perfect for both women and men; any age as long as you have a healthy diet, regularly work-out and a non-smoker.

**Treatment Cost?** \$95-150.00 per treatment session. 3 - 5 sessions are suggested for results, but initially based on individual. Consultations take place prior to treatment to see if it is a good fit for the individual.

**How long is the treatment?** Approximately 30 minutes to 1 hour, depending on the individual. There are EXPRESS Sessions available for 30 Minutes.
