

A Wild Purée of Tropical Blends in Satin Smooth® Waxes!

Two sinuous, sensuous depilatories, WILD CHERRY® and CALENDULA GOLD® fused with essential oils join the legendary line from ConairPRO®

Stamford, CT – Indulge in delightful experiences, exclusive spa secrets, antibacterial formulas, delicious scents, gentle processes, built-in buffers, formulas derived from nature's ingredients. Making this hair removal line perhaps the most beautiful line ever designed. It's as much of a treat for the professional to deliver, as it is for the customer to experience.

Once upon a time, ConairPro® created the Satin Smooth® line and now, hurtful depilation is extinct. So is messy, hot, uncomfortable hair removal that often left skin in worse condition than before it was treated. These two new amazing waxes are the latest entries in the line of waxes, warmers, before and after depilatory products and waxing accessories created, with all the benefits of our years of professional experience, in our research and development facilities.

WILD CHERRY® HARD WAX, like the entire line, is based on natural beeswax from Italy, in a unique blend containing a natural antibiotic, propolis. It has a built-in buffer between the wax and tender skin – the great Vitamin E – to protect skin, heal it and even eliminate the need for dusting powder afterward. Emollients in the formula minimize hair breakage, promising long, long-lasting results. Its fruit extracts from wild cherries calm skin so that the process is serene. Skin emerges 'satin smooth' – there's no better way to say it! Recommended for Brazilian bikini waxing, formulated for medium to coarse hair and can be used in all sensitive areas and developed for all types of skin.

CALENDULA WAX WITH TEA TREE OIL is based on the wild marigold, used for centuries as an anti-inflammatory, a wound-healer and an antiseptic because of its flavonoids, among other properties. Tea Tree Oil has become a modern classic because of its ability to relax the skin, making the hair removal process easier on the professional and the client. Skin, even the most tender areas, comes out not only free of hair, but free of everything but satin smoothness. Recommended for Brazilian bikini waxing, formulated for thick, coarse, curly stubborn hair, can be used on sensitive areas and developed for all skin types.

The mystery is in the mix!
