

HOT LEGS

I LOVE YOU HONEY *WAX*

Rod Stewart made millions singing about hot legs, and why not? After all, there is nothing more sensuous than sexy smooth legs, especially after a waxing service. Spring is here, and it's time to heat up your waxing schedule with appointments and get your clients' legs in soft, sexy, Satin Smooth® condition for the season!

3. Remove wax in small sections from right to left, holding skin taut and removing the cloth in the opposite direction of hair growth in a pull-punch motion. After removing strip, apply pressure with the other hand to calm the area.

4. For lower sections, have client lay legs flat. Apply wax from end of knee to ankle in one long application from right to left, moving fast down to ankle.

5. For wax removal, repeat step #3

6. Apply wax to the back of the leg. Always work right to left. This technique will prevent your hands from getting sticky. Remember to always start at the bottom of the leg and work your way up to avoid missing spots.

7. Repeat step #3 until lower leg is completed and move on to the next. Remove any excess wax on the skin by blotting it with a folded cloth, using the same pull-punch motion.

8. Use Satin Smooth Release® to remove any wax residue. Check the area and remove stray hairs with tweezers. Apply Satin Smooth Cool® to calm, reduce irritation, close the pores and soothe the areas. Then apply Satin Smooth Hydrate® to bring the pH Level of the skin to normal and hydrate the area.

Educate your client on aftercare and maintenance. No tanning for 48 hours. If breakout occurs, advise them to use an antibiotic ointment on the area. Suggest they use a scrub four times a week with a natural loofah, to keep dead skin cells from building up and prevent ingrown hairs and bumps. Schedule her next appointment in three to four weeks.

“Spring is here, and it's time to heat up your waxing schedule with appointments and get your clients' legs in soft, sexy, **Satin Smooth®** condition for the season!”

Preparing Skin

1. Before starting a leg waxing service, note that the client's hair should be at least 1/4" long. Begin service by cleansing the legs with Satin Smooth Cleanse® using cotton pads and applying gentle pressure.

2. Start by applying wax on lower portion of the knee and leg from right to left. Then proceed to the top of the knee. The thicker the hair, the more wax you will need to apply. The thinner the hair, the less wax you will need to apply. Control the amount of wax by the pressure you apply on the roller head.
